

GEPEC Global Meeting 2023 - The 3rd Circular -

GEPEC (Global Engineering, Promotion and Education Collaborative) was co-founded in 2005 by the late Dr. Daryl Beach and Dr. Michael Dougherty. This 2023 event is the first Global Meeting to be held in Osaka, Japan, and will celebrate the 60th anniversary of Spaceline CU 1, a dental unit developed in Japan by the late Dr Beach. The status quo of dental practice and its settings varies across the world. It is our wish that those who have been working on pd dissemination in different situations will gather for a constructive discussion about our common tasks and goals. Topics to be discussed include “how to realize pd practice,” “how to convey pd practice to the next generation,” and best approaches to realize a breakthrough for the future.

Everyone interested in pd and 0-concept is invited and is most welcome to participate.

Dr Masashi Ishida

Congress President
GEPEC Director

Dr Hiroki Isozaki

Executive Committee
Chairman
GEPEC Member

Dr Michael Dougherty

GEPEC President

late Dr Daryl Beach
